

## **Whittington Hospital turns to PowerHealth Solutions for patient costing**

6<sup>th</sup> September 2007

Australian software developer PowerHealth Solutions is proud to announce that [The Whittington Hospital NHS Trust](#) has purchased its technologically advanced patient level costing and service line reporting system, [PowerPerformance Management](#), together with the [Power Business Reporting](#) suite of ad-hoc, management and digital dashboard reporting tools.

The Whittington Hospital  
NHS Trust

PowerHealth Solutions is internationally recognised for its functionally rich and technologically advanced [healthcare business improvement systems](#), with implementations in Australia, New Zealand, USA and UK.

Using [web-based and open systems technology](#), PowerHealth Solutions software links to all existing hospital systems to correlate financial, clinical and operational data — all absolutely essential for making informed decisions.

PowerHealth Solutions is partnering with UK software supplier [Health Information Systems \(UK\) Ltd \(HISL\)](#), leveraging their local knowledge and industry expertise with PowerHealth Solutions' products.

With over 25 acute clinics and a similar number of Primary Care Trusts using their VECTOR multi-disease, chronic disease management/long term care electronic patient record systems, HISL is ideally placed to support the PowerPerformance Management and PowerBusiness Reporting product range in the UK.

Mr Steve Courtney, HISL CEO said, “We are every excited to be bringing PowerHealth Solutions systems to the UK health industry.

Using these specialised costing and reporting systems, NHS Trusts can expect a positive return on investment, and revolutionise healthcare business decision-making”.

### **About Whittington NHS Trust**

[The Whittington Hospital NHS Trust](#) is an [award-winning](#) acute general teaching hospital in North London, providing care for a community of 300,000. The hospital annually cares for 38,000 inpatients and 175,000 outpatients, with 85,000 emergency attendances.

***About PowerPerformance Management and PowerBusiness Reporting***

PowerPerformance Management is the leading patient costing, decision support and performance management solution for healthcare organisations in Australia and New Zealand, and is becoming increasingly popular in the United States and UK.

PowerBusiness Reporting is comprehensive reporting solutions for hospitals. Linked with PowerPerformance Management, it transform massive volumes of operational healthcare data into meaningful business intelligence, with dashboard charts, detailed reports and interactive analysis.
